Salesforce Developer(Course)
Assignment

Name : Arthi p
Naan Mudhalvan id : 620120104007
Year & Dep : IV Year & CSE
Batch : 2024
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "College".

New Custom Object

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label	College	Example: Account
Plural Label	Colleges	Example: Accounts
Starts with vowel sound	<input type="checkbox"/>	

The Object Name is used when referencing the object via the API.

Object Name	College	Example: Account
-------------	---------	------------------

Description

Content-Sensitive Help Setting

Open the standard Salesforce.com Help & Training window
 Open a window using a Visualforce page

Content Name

Content Name

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name	College Name	Example: Account Name
-------------	--------------	-----------------------

Save Save & New Cancel

Tabs - Step 1 of 1

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

22.21

Screenshot of the Salesforce Object Manager interface for the 'Department' object.

The left sidebar shows the following navigation:

- Details
- Fields & Relationships** (selected)
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules
- Scoping Rules
- Triggers
- Flow Triggers

The main content area displays various field types with their descriptions:

- Currency: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date: Allows users to enter a date or pick a date from a pop-up calendar.
- Date/Time: Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation: Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
- Number: Allows users to enter any number. Leading zeros are removed.
- Percent: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist: Allows users to select a value from a list you define.
- Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- Text: Allows users to enter any combination of letters and numbers.
- Text Area: Allows users to enter up to 255 characters on separate lines.
- Text Area (Long): Allows users to enter up to 131,072 characters on separate lines.
- Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50:600" are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

At the bottom right of the main content area are 'Next' and 'Cancel' buttons.

Screenshot of the 'New Custom Field' configuration page for the 'Department' object.

The left sidebar shows the same navigation as the previous screenshot.

The main content area is titled 'Step 2. Enter the details' and includes the following fields:

- Field Label:
- Field Name:
- Description: (empty text area)
- Help Text: (empty text area)
- Required: Always require a value in this field in order to save a record
- Unique: Do not allow duplicate values
- External ID: Set this field as the unique record identifier from an external system
- Auto add to custom report type: Add this field to existing custom report types that contain this entity

Below these settings is a 'Default Value' section with a 'Show Formula Editor' button. A tooltip for the formula editor explains its syntax: "Use formula syntax. Enclose text and picklist value with names in double quotes. '{!the_field}' include numbers without quotes. {!PI} show percentages as decimal. {!TODAY} and express date calculations in the standard format: {!TODAY} + 7. To reference a field from a Custom Metadata type record use: \${CustomMetadataType__r.records[0].field__c}"

Screenshot of the Salesforce Object Manager page for the 'Department' object.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Department.

The main content area displays a list of field types:

Field Type	Description
Currency	Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
Date	Allows users to enter a date or pick a date from a pop-up calendar.
Date/Time	Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
Email	Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
Geolocation	Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
Number	Allows users to enter any number. Leading zeros are removed.
Percent	Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
Phone	Allows users to enter any phone number. Automatically formats it as a phone number.
Picklist	Allows users to select a value from a list you define.
Picklist (Multi-Select)	Allows users to select multiple values from a list you define.
Text	Allows users to enter any combination of letters and numbers.
Text Area	Allows users to enter up to 255 characters on separate lines.
Text Area (Long)	Allows users to enter up to 131,072 characters on separate lines.
Text Area (Rich)	Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
Text (Encrypted)	Allows users to enter any combination of letters and numbers and store them in encrypted form.
Time	Allows users to enter a local time. For example, '2:40 PM', '14:40', '14:40:00', and '14:40:50.600' are all valid times for this field.
URL	Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

At the bottom right of the page are 'Next' and 'Cancel' buttons.

Screenshot of the 'New Custom Field' creation wizard for the 'Department' object.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Department.

The main content area is titled 'New Custom Field' and is on 'Step 2. Enter the details'.

The form fields are:

Field Label	Dept_No.
Field Name	Dept_No
Description	(empty)
Help Text	(empty)

Below the form:

- Required:** Always require a value in this field in order to save a record
- Auto add to custom report type:** Add this field to existing custom report types that contain this entity

Default Value: Show Formula Editor

Use formula editor. Enclose text and picklist value with quotes in double quotes ("Dept_No"). Include modulus without quotes (%). Shows percentages as decimal (.10), and performs date calculations in the standard format (Today() * 7). To reference a field from a Custom-Metadata type record use: \$CustomMetadata.Type__mdt.AliasName\$Field__c

At the bottom right of the page are 'Previous', 'Next', and 'Cancel' buttons.

Setup Home Object Manager

SETUP > OBJECT MANAGER Department

Fields & Relationships

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

This screenshot shows a CRM application interface. At the top, there's a navigation bar with a cloud icon, the text "My-app", and dropdown menus for "College" and "Department". A search bar is located at the top right. Below the header, a card displays information for a college named "AVS". The card includes fields for "College Name" (AVS), "Total Count" (0), and two timestamped activity logs: "Created By" (Arthi) on 18/10/2023 at 3:28 pm and "Last Modified By" (Arthi) on the same date and time. There are tabs for "Related" and "Details", with "Details" being the active tab.

This screenshot shows a CRM application interface with a modal window titled "New Department". The window is part of a "Department" module, indicated by the dropdown menu in the top left. The main area is labeled "Information" and contains several input fields: "Department Name" (CSE), "Email" (cse@gmail.com), "Phone" (1234567899), and "College" (selected to "AVS"). A note at the top right indicates that the "College" field is required. At the bottom of the modal are three buttons: "Cancel", "Save & New", and "Save". The background shows a sidebar with a "Recently Viewed" section and other navigation options.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "Details".

The "Custom Object Definition Edit" section includes:

- Custom Object Information:** Label: Details, Plural Label: Details, Starts with vowel sound:
- Object Name:** Object Name: Details, Example: Account
- Description:** A large text area for entering a description.
- Content-Sensitive Help Setting:** Open the standard Salesforce.com Help & Training window (selected).
- Content Name:** None

A message at the top states: "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles." Buttons for Save, Save & New, and Cancel are available.

The browser address bar shows: nanmudhalvan-dev-ed.lightning.force.com/lightning/setup/ObjectManager/new

Screenshot of the Salesforce Setup interface showing the "Details" object details page.

The left sidebar lists various configuration options under "Details": Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main "Details" section displays the following settings:

- Description:** A text input field.
- API Name:** Details_c
- Custom:** ✓
- Singular Label:** Details
- Plural Label:** Details
- Enable Reports:** A checkbox.
- Track Activities:** A checkbox.
- Track Field History:** A checkbox.
- Deployment Status:** Deployed
- Help Settings:** Standard salesforce.com Help Window

Buttons for Edit and Delete are located in the top right corner.

Setup Home Object Manager

SETUP > OBJECT MANAGER Details

Fields & Relationships

- Lookup Relationship
- Master Detail Relationship
- External Lookup Relationship
- Checkbox
- Currency
- Date
- DateTime
- Email
- Geolocation
- Number
- Percent
- Phone
- Picklist
- Picklist (Multi-Select)
- Text

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to summarize the detail records. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Salesforce Setup Page - Fields & Relationships

The page shows the 'Fields & Relationships' tab selected under 'Fields & Relationships'. A list of field types is shown on the left, each with a brief description on the right.

Field Type	Description
Currency	Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
Date	Allows users to enter a date or pick a date from a popup calendar.
DateTime	Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.
Email	Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
Geolocation	Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
Number	Allows users to enter any number. Leading zeros are removed.
Percent	Allows users to enter a percentage number, for example, '17' and automatically adds the percent sign to the number.
Phone	Allows users to enter any phone number. Automatically formats it as a phone number.
Picklist	Allows users to select a value from a list you define.
Picklist (Multi-Select)	Allows users to select multiple values from a list you define.
Text	Allows users to enter any combination of letters and numbers.
Text Area	Allows users to enter up to 255 characters on separate lines.
Text Area (Long)	Allows users to enter up to 131,072 characters on separate lines.
Text Area (Rich)	Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
Text (Encrypted) 	Allows users to enter any combination of letters and numbers and store them in encrypted form.
Time	Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50.600" are all valid times for this field.
URL	Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

4.Create a screen flow for a basic survey to fill in the details for any form.

The screenshot shows the Salesforce Setup interface with the title 'New Custom Object'. The top navigation bar includes tabs for WhatsApp, Job Profile, New Custom Object | Sales, and Lightning Experience | Sales. The main content area has a search bar labeled 'Search Setup' and a 'Setup' button. The 'Object Manager' tab is selected. The page displays fields for creating a new custom object, including 'Label' (Bank), 'Plural Label' (Banks), 'Object Name' (Barik), and a 'Description' section. It also includes 'Context-Sensitive Help Setting' (Open the standard Salesforce.com Help & Training window) and 'Content Name' (None). A note at the bottom states: 'The Record Name Attribute is used in many contexts, such as lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name", and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.'

The screenshot shows a Salesforce Lightning Experience interface. The top navigation bar includes tabs for WhatsApp, Job Profile, Home | Salesforce, and Lightning Experience | Sales. Below the navigation is a toolbar with icons for Gmail, YouTube, Maps, Global NetAcad L..., and Edubee Interactive... A search bar labeled "Search Setup" is also present.

The main content area is titled "Tabs" under the "SETUP" tab. On the left, a sidebar lists "User Interface" sections: "Rename Tabs and Labels" and "Tabs". A message at the bottom of the sidebar says, "Didn't find what you're looking for? Try using Global Search." The main panel is titled "New Custom Object Tab" and displays "Step 1 of 3". It asks to choose a custom object for the tab, with "Bank" selected from a dropdown menu. Other options include "Object" (dropdown), "Tab Style" (dropdown with "Blank" and "Castle" options), and a search icon. An optional section allows choosing a "Splash Page Custom Link" with a dropdown set to "...None...". A "Description" field is provided with a placeholder "Description". At the bottom right are "Next" and "Cancel" buttons.

Screenshot of the Salesforce Object Manager setup page for the "Bank" object.

New Custom Object

Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label: Customer | Example: Account
Plural Label: Customers | Example: Accounts
Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: Customer | Example: Account

Description

Context-Sensitive Help Setting

Open the standard Salesforce.com Help & Training window
 Open a window using a Visualforce page

Content Name: None

Enter Record Name Label and Format

The Record Name appears in name searches, save lists, related lists, inline edit, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A readonly field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A readonly field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

This screenshot shows the Salesforce Setup interface for managing Profiles. It displays a grid of checkboxes for granting various permissions (Basic Access and Data Administration) across different objects like Bank, College, and Customer. The Bank object has Read, Create, Edit, Delete, View All, and Modify All permissions enabled. The College object has Read, Create, Edit, and View All permissions enabled. The Customer object has Read, Create, and View All permissions enabled. Other objects like Department, Details, and Management have no permissions listed.

Cloud My-app Recently Viewed College Department Details Management Customers Bank

Customers Recently Viewed ▾

0 items • Updated a few seconds ago

Total Life Time Value Name

Full-screen Sip

You haven't viewed any Customers recently.
Try switching list views.

The screenshot shows the Salesforce Lightning Experience interface. At the top, there's a navigation bar with tabs like WhatsApp, Job Profile, Flows, Flow Builder, and Lightning Experience. Below that is a secondary navigation bar with links for Gmail, YouTube, Maps, and other applications. The main content area has a blue header bar with tabs for Cloud, My-app, Recently Viewed, College, Department, Details, Management, Customers, and Bank. Under the Customers tab, there's a section titled 'Recently Viewed' with a dropdown arrow. It shows a message: '0 items • Updated a few seconds ago'. Below this is a table header with columns for 'Total Life Time Value' and 'Name'. A message at the bottom says, 'You haven't viewed any Customers recently. Try switching list views.' There are also 'Full-screen Sip' and search/filter buttons at the bottom of the list view.
